A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7/30/08 has been entered.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Re claims 1-26, applicant uses terms such as "tilts forwardly relative to the ground" in all independent claims which makes all the claims unclear and although it was tried, in the end it is impossible to effectively judge the merits of the prior art relative to these claims. The relative direction is important but it is not established how something on the truck can be forward or rearward of the ground itself. Applicant should review all claim limitations of all claims to make sure there are no other errors or problems.
